CONNECTING YOU TO THE WORLD OF ELECTRICITY

Introducing Clariant: Where Innovation Meets Performance!

At Clariant, we are not just a company, but a team of passionate individuals who believe in creating products that enhance your life. Our story began in 2014, when we embarked on a mission to revolutionise the world of electric accessories. We wanted to make a difference, not just in terms of efficiency and effectiveness but also in providing a unique customer experience.

Our team of experts is committed to manufacturing products that stand out in the market. We don't just focus on quality; we make sure that our products meet and exceed the expectations of our customers. We are proud to say that our electric accessories are designed with safety as our top priority. We use only the best materials and machinery to ensure that our products are safe to use and have a longer life span.

Our state-of-the-art manufacturing unit is equipped with cutting-edge technology that helps us deliver top-quality products to our customers. We understand that our customers have diverse requirements, and that's why we have a vast product line that caters to all their needs. Whether you need electric accessories for your home or business, we've got you covered.

At Clariant, we are always striving to innovate and improve. Our experienced R&D department is constantly researching and experimenting with new ideas to make our products even better. We believe that our customers are the driving force behind our success, and we take pride in building long-lasting relationships with them.

We also offer customization facilities to meet the unique needs of our customers. Our stringent quality standards and robust infrastructural base make us the go-to brand for electric accessories. We have a competent team of professionals and strong logistical support that ensures that our products are available globally.

In conclusion, at Clariant, we don't just make things better; we make them **exceptional**. Choose us for the most reliable, efficient, and innovative electric accessories that are designed to enhance your life.

03

PLASTIC WALL PLUGS

SUPERIOR
QUALITY

02

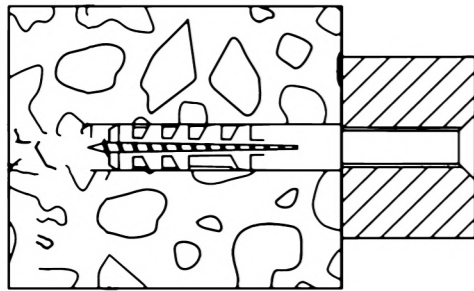

05

Wall plugs are dowel or pin-like structures that are used in the drilled hole to provide grip to the screws. They are used to ensure that screws are securely fit inside the wall.

The wall plugs served here are geometrically perfect, thanks to their symmetrical and accurate design, which tends to make the final outcome even more stunning and precise

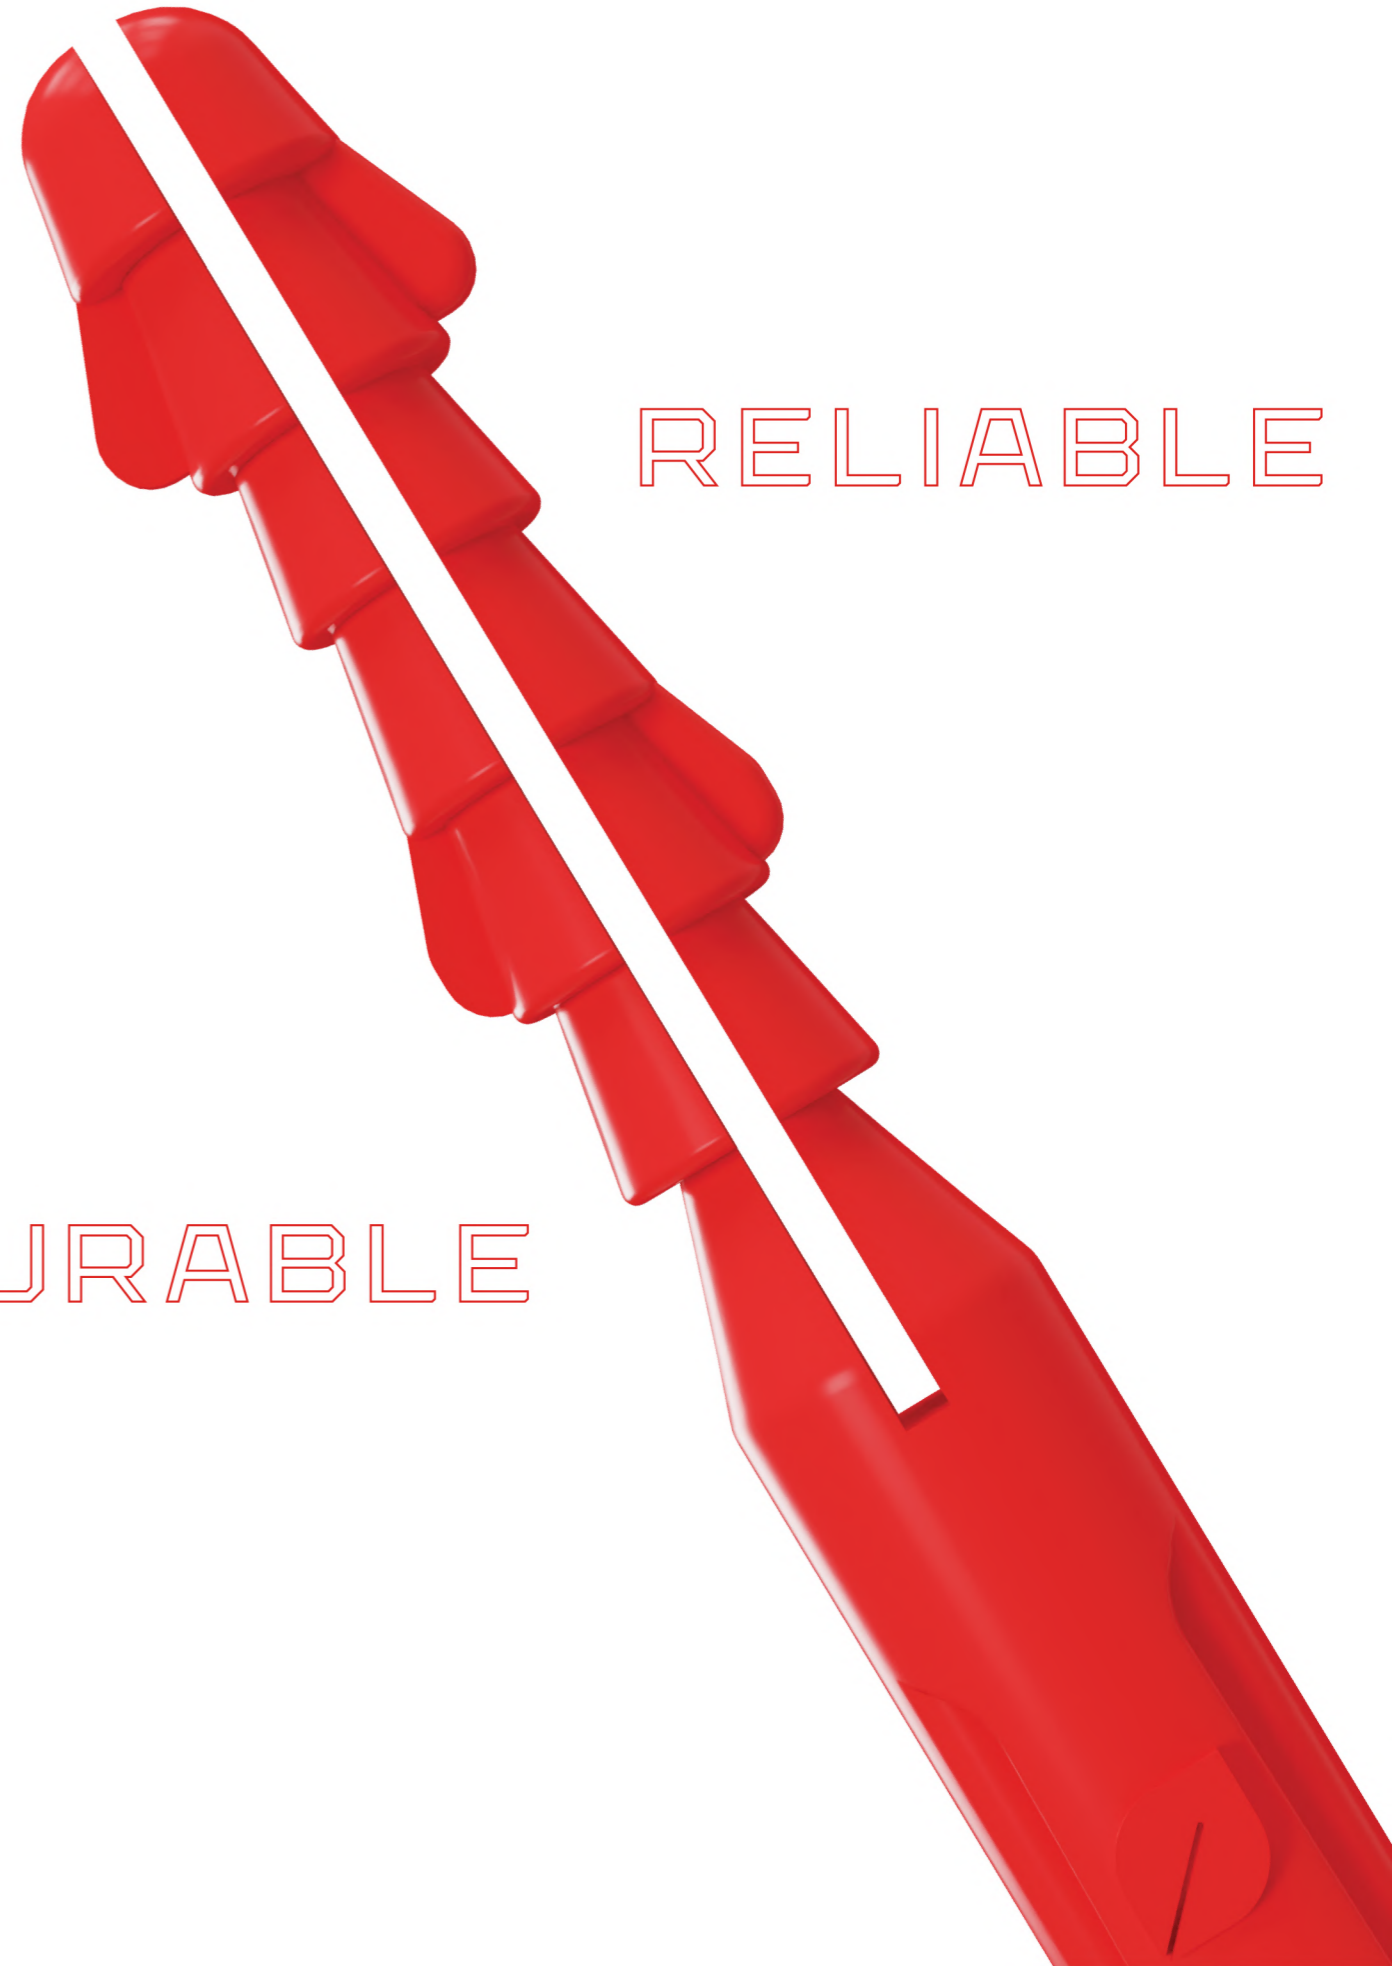

PERKS

Offering you a complete choice of plastic wall plugs, sizes 25mm to 50mm. Available in both square and round type models.

Available all in three colors milky white, natural white & grey. A customization facility is also available.

Wall plugs manufactured here are designed to be compatible with 6 to 10 no screws.

VARIANT	DRILL DIAMETER	MIN. DRILL HOLE DEPTH	SCREW SIZE
R-25MM	5	35MM	3.0 - 4.0 (MM)
R-32MM	6	40MM	4.0 - 5.0 (MM)
R-35MM	6	40MM	4.0 - 6.0 (MM)
R-38MM	8	55MM	4.0 - 8.0 (MM)
R-50MM	10	70MM	4.0 - 10.0 (MM)
S-35MM	6	40MM	4.0 - 6.0 (MM)
S-38MM	8	55MM	4.0 - 8.0 (MM)
S-50MM	10	70MM	4.0 - 10.0 (MM)
H-35MM	6	50MM	4.0 - 8.0 (MM)
H-40MM	8	55MM	4.0 - 10.0 (MM)
H-50MM	10	70MM	8.0 - 12.0 (MM)

RELIABLE

DURABLE

Round Sheets

Round Sheet

08 They are intended to hide any unprotected cables from electrical outlets. They're made of virgin PVC, which makes them rigid and durable. These round sheets are used to cover any outlet openings and safeguard the wires.

Clariant has a wide assortment of round sheets for a variety of functions and applications. You can conceal various outlets while keeping bulb holders in their original positions.

PERKS

Round sheets presented here have a high level of finish and aesthetic appeal. They are intended to cover up cables even while providing a clean and attractive appearance to the home or work environment.

The round sheets offered here are entirely made of virgin PVC. They are rigidly built, and their damage resistance limits deformation. The texture provides excellent grip while installing them.

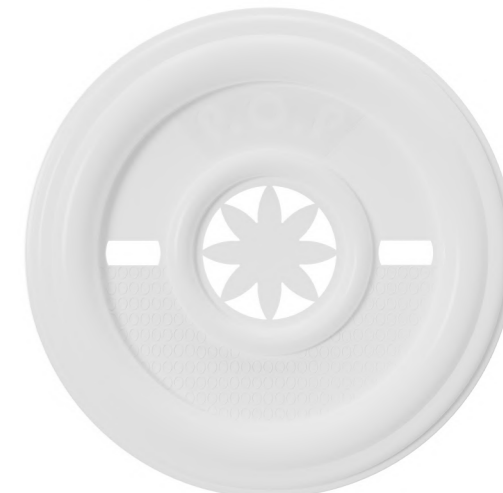

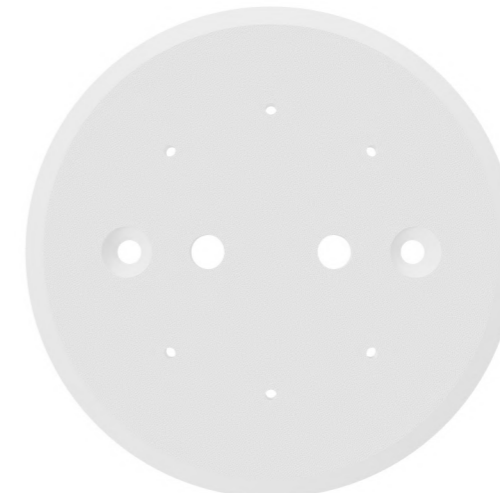

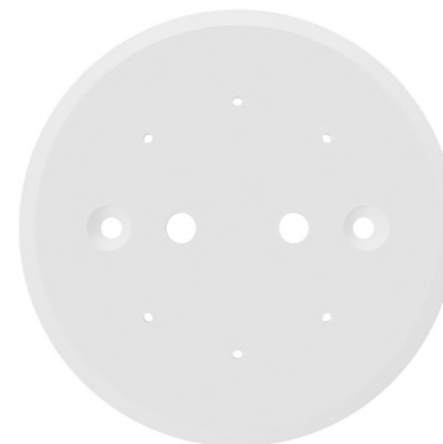

Because the dimensions of these round sheets are suitable for all types of holders, they are designed in such a way that electrical holders can be installed without difficulty.

3.5X3.5

4X4

4X4 P.O.P.

Fan Sheets

7X7 ROUND MODULAR

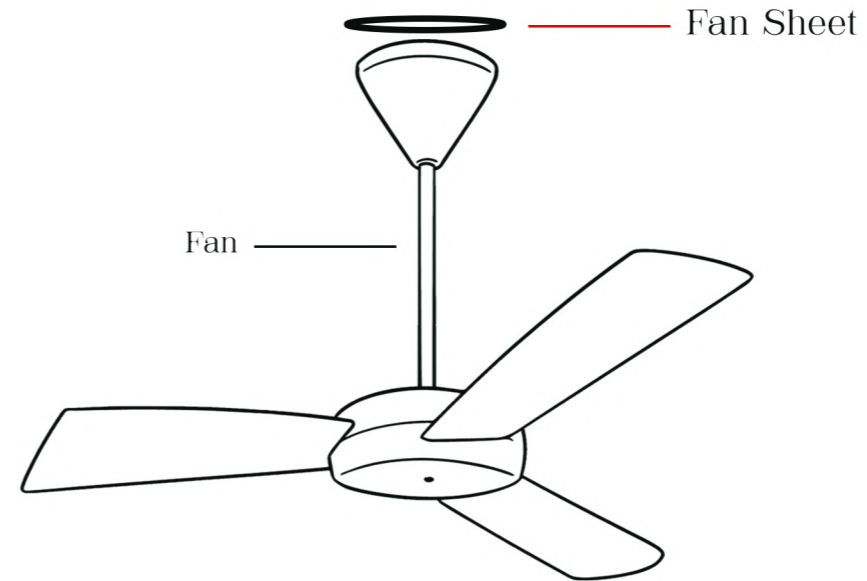

Fan Sheet

10

Fan sheets are circular-shaped sheets that are used in fans. Its primary function is to protect the encased electrical wiring for fans. They can also be used to make a mounting base for bulb holders or ceiling roses.

These are also known as fan plates, cover plates, round plates, electrical cover plates, and other similar terms and they serve several important functions in a fan's operation.

PERKS

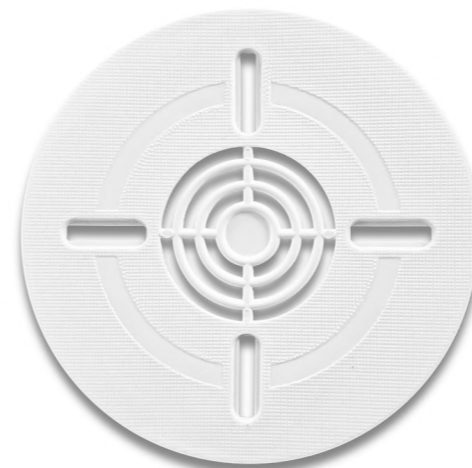

Improved Airflow: Round sheets are strategically placed around the motor in the fan to direct the airflow towards the blades. This design allows for increased air circulation and improved cooling in a room.

Noise Reduction: The use of round sheets in fans can help reduce noise levels. The sheets act as a barrier between the motor and the blades, muffling the sound created by the motor's movement.

These fan sheets are available in 6x6, 7x7, 7x7 P.O.P., 7x7 modular, and 5x5 square modular sizes.

Overall, the use of round sheets in fans is an important design element that helps to improve their performance, reduce noise levels, and add aesthetic appeal.

5X5 SQUARE MODULAR

7X7 P.O.P.

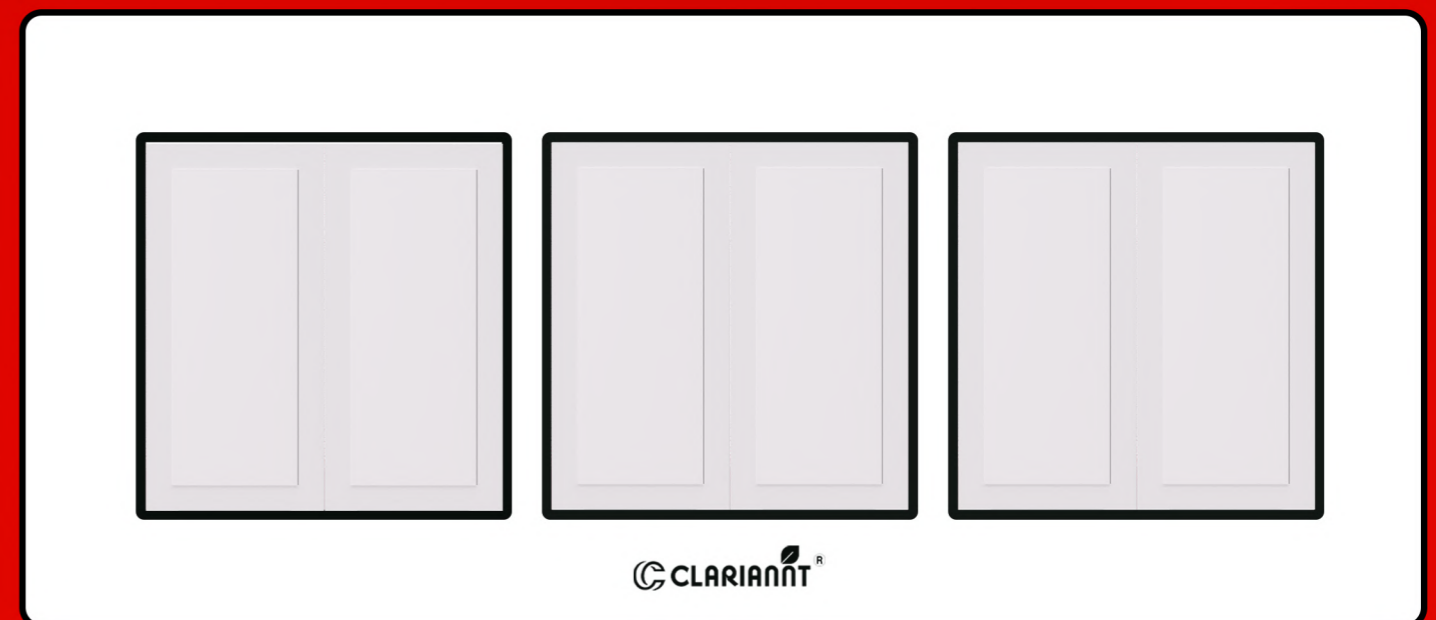

Blank Switch

A blank switch, also known as a dummy switch, is a switch that does not control any electrical devices but is used to fill an empty spot in a switch panel or electrical box. It is designed to provide a uniform look to the switch panel and prevent dust and debris from entering the electrical box.

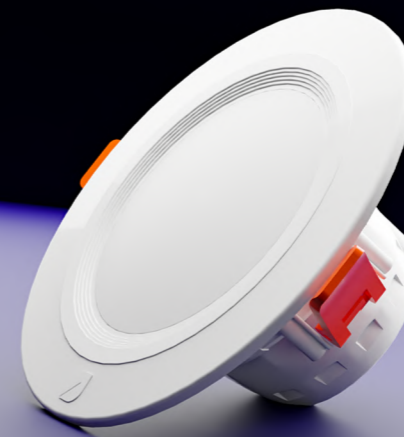

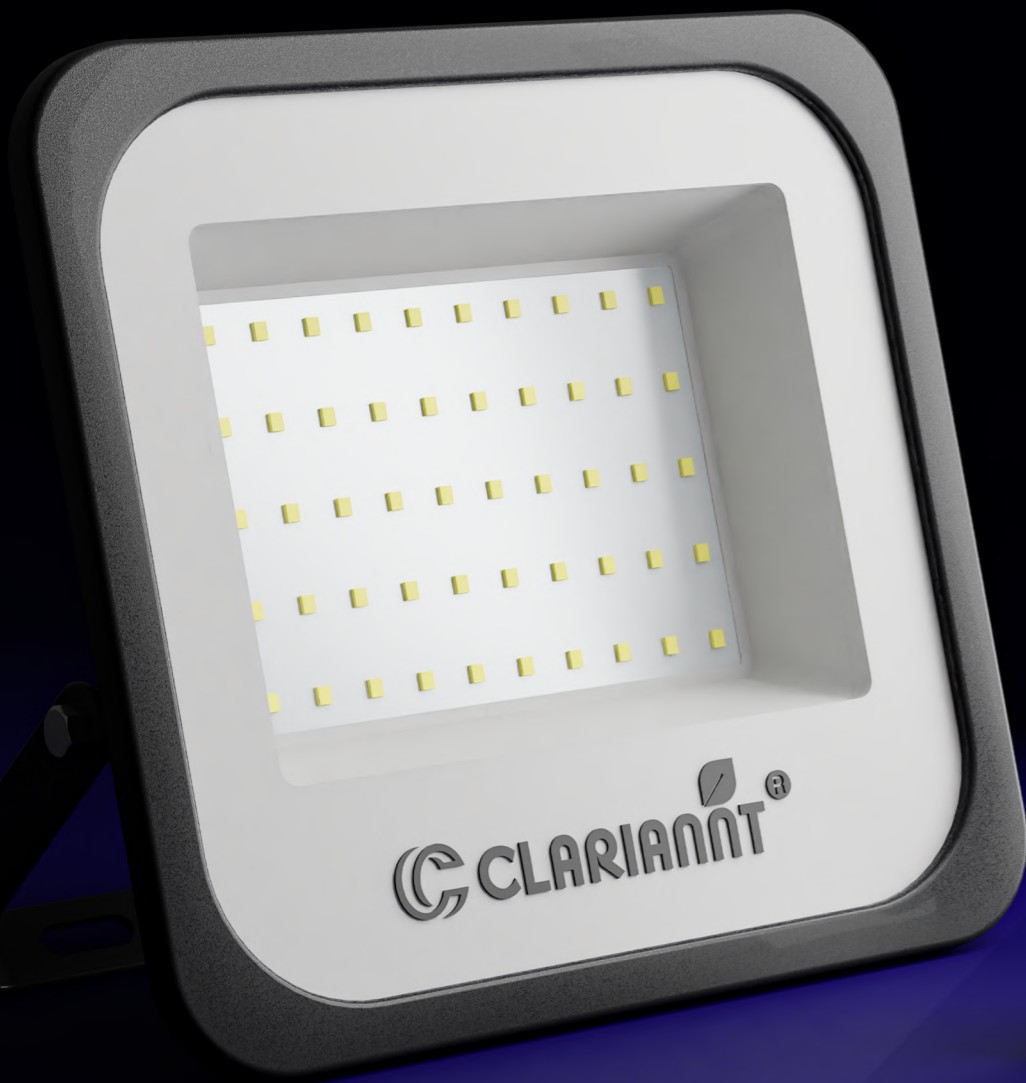

Some common uses of blank switches include:

- To fill an empty spot in a switch panel or electrical box when no electrical devices are needed in that location.
- To provide a placeholder for future expansion of the electrical system.
- To maintain the symmetry and aesthetic appeal of the switch panel.

MODULAR GANG BOXES

Plastic modular gang boxes are electrical enclosures designed for use in a variety of electrical applications. These boxes are made of a high-impact plastic material that is resistant to corrosion, rust, and damage from weather and environmental factors. They are typically used in commercial, industrial, and residential applications to protect electrical wiring, outlets, and switches.

Prime
Series

Advantages of plastic modular gang boxes include:

Durability: Plastic modular gang boxes are designed to withstand impact and resist damage from environmental factors such as moisture, heat, and chemicals. They can provide long-lasting protection for electrical components in harsh environments.

Versatility: These boxes can be used in a variety of electrical applications and can accommodate a range of different electrical components, including switches, outlets, and wiring.

Easy to install: Plastic modular gang boxes are lightweight and easy to install, and can be easily secured to walls or other surfaces.

Silverline

THE VERSATILITY YOU NEED, THE CONVENIENCE YOU DESERVE - MODULAR GANG BOXES

PVC Surface Box

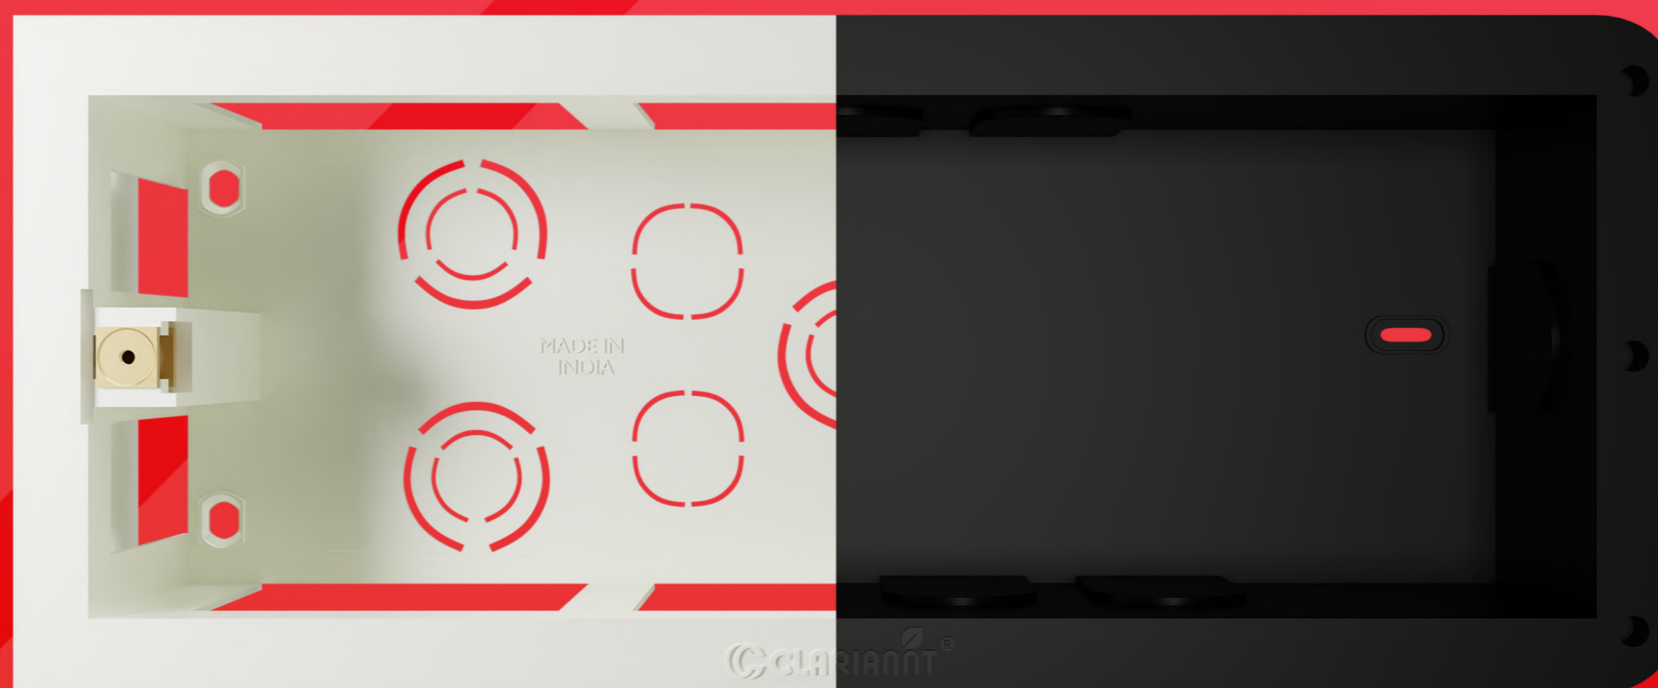

Introducing Clariantt's PVC Surface Boxes in brown and white, tailored for screw-based switches. These durable, easy-to-install boxes offer seamless compatibility, aesthetic appeal, and accessibility. Perfect for renovations, high-traffic areas, workshops, and temporary setups. Elevate your electrical solutions with Clariantt's innovative PVC Conceal Box.

Metal Conceal Box

Over a decade of excellence culminates in a safety-focused solution. Robust metal construction ensures durability, while versatility suits industries from manufacturing to hospitality. Effortless installation and aesthetics meet in this sleek design. With unwavering customer service, Clariantt delivers more than concealment—it offers security and style for every setting.

Open Surface Box

For more than a decade, Clariantt has been your reliable electrical solutions partner, and our Surface Boxes are no different. We've produced a product that succeeds in every manner, based on our guiding principles of safety, durability, adaptability, simple installation, aesthetic appeal, and first-rate customer service.

PVC Conceal Box

Merge safety and elegance with ease. These boxes, which are made of sturdy PVC, handle wires in a variety of settings, including businesses and houses. A new standard in cable management is defined by its simplicity, visual appeal, and first-rate support. For areas where style and security are priorities, use Clariantt.

MCB Box

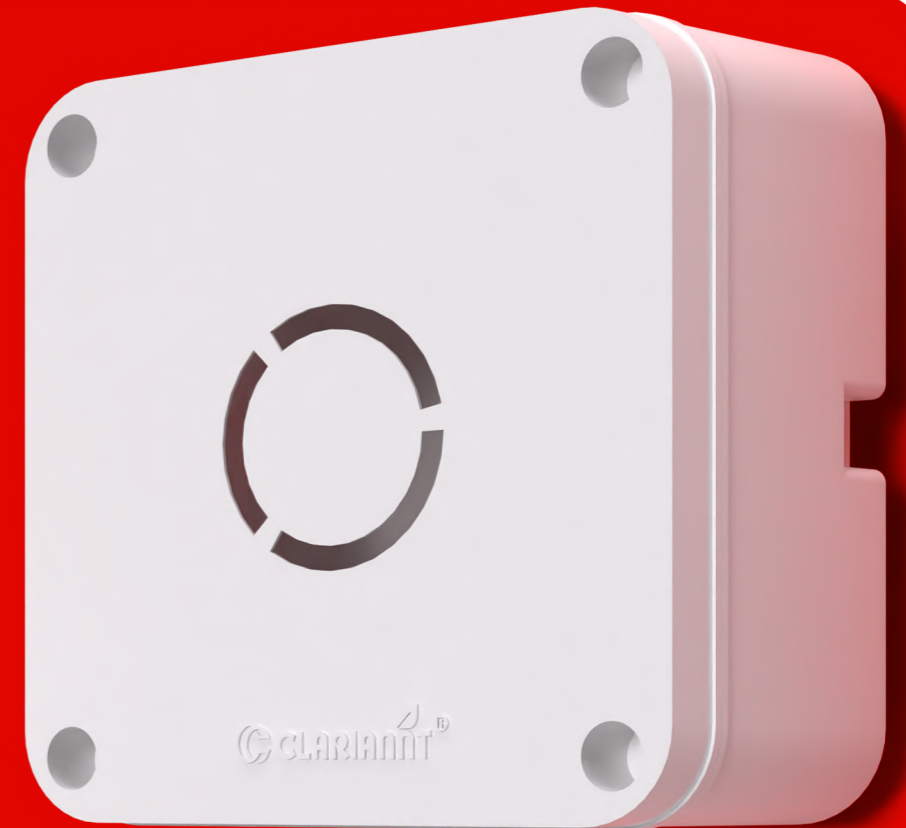

Clariant has been a leader in the electrical sector for almost ten years, delivering innovative solutions to improve efficiency and safety. The Miniature Circuit Breaker (MCB) box, a landmark product that has revolutionised power distribution, is essential to our success. The MCB boxes from Clariant have a number of benefits, including easy modification, long-term dependability, and increased safety measures. These boxes are used in a variety of residential, commercial, and industrial settings to provide smooth electrical distribution while protecting tools, assets, and people.

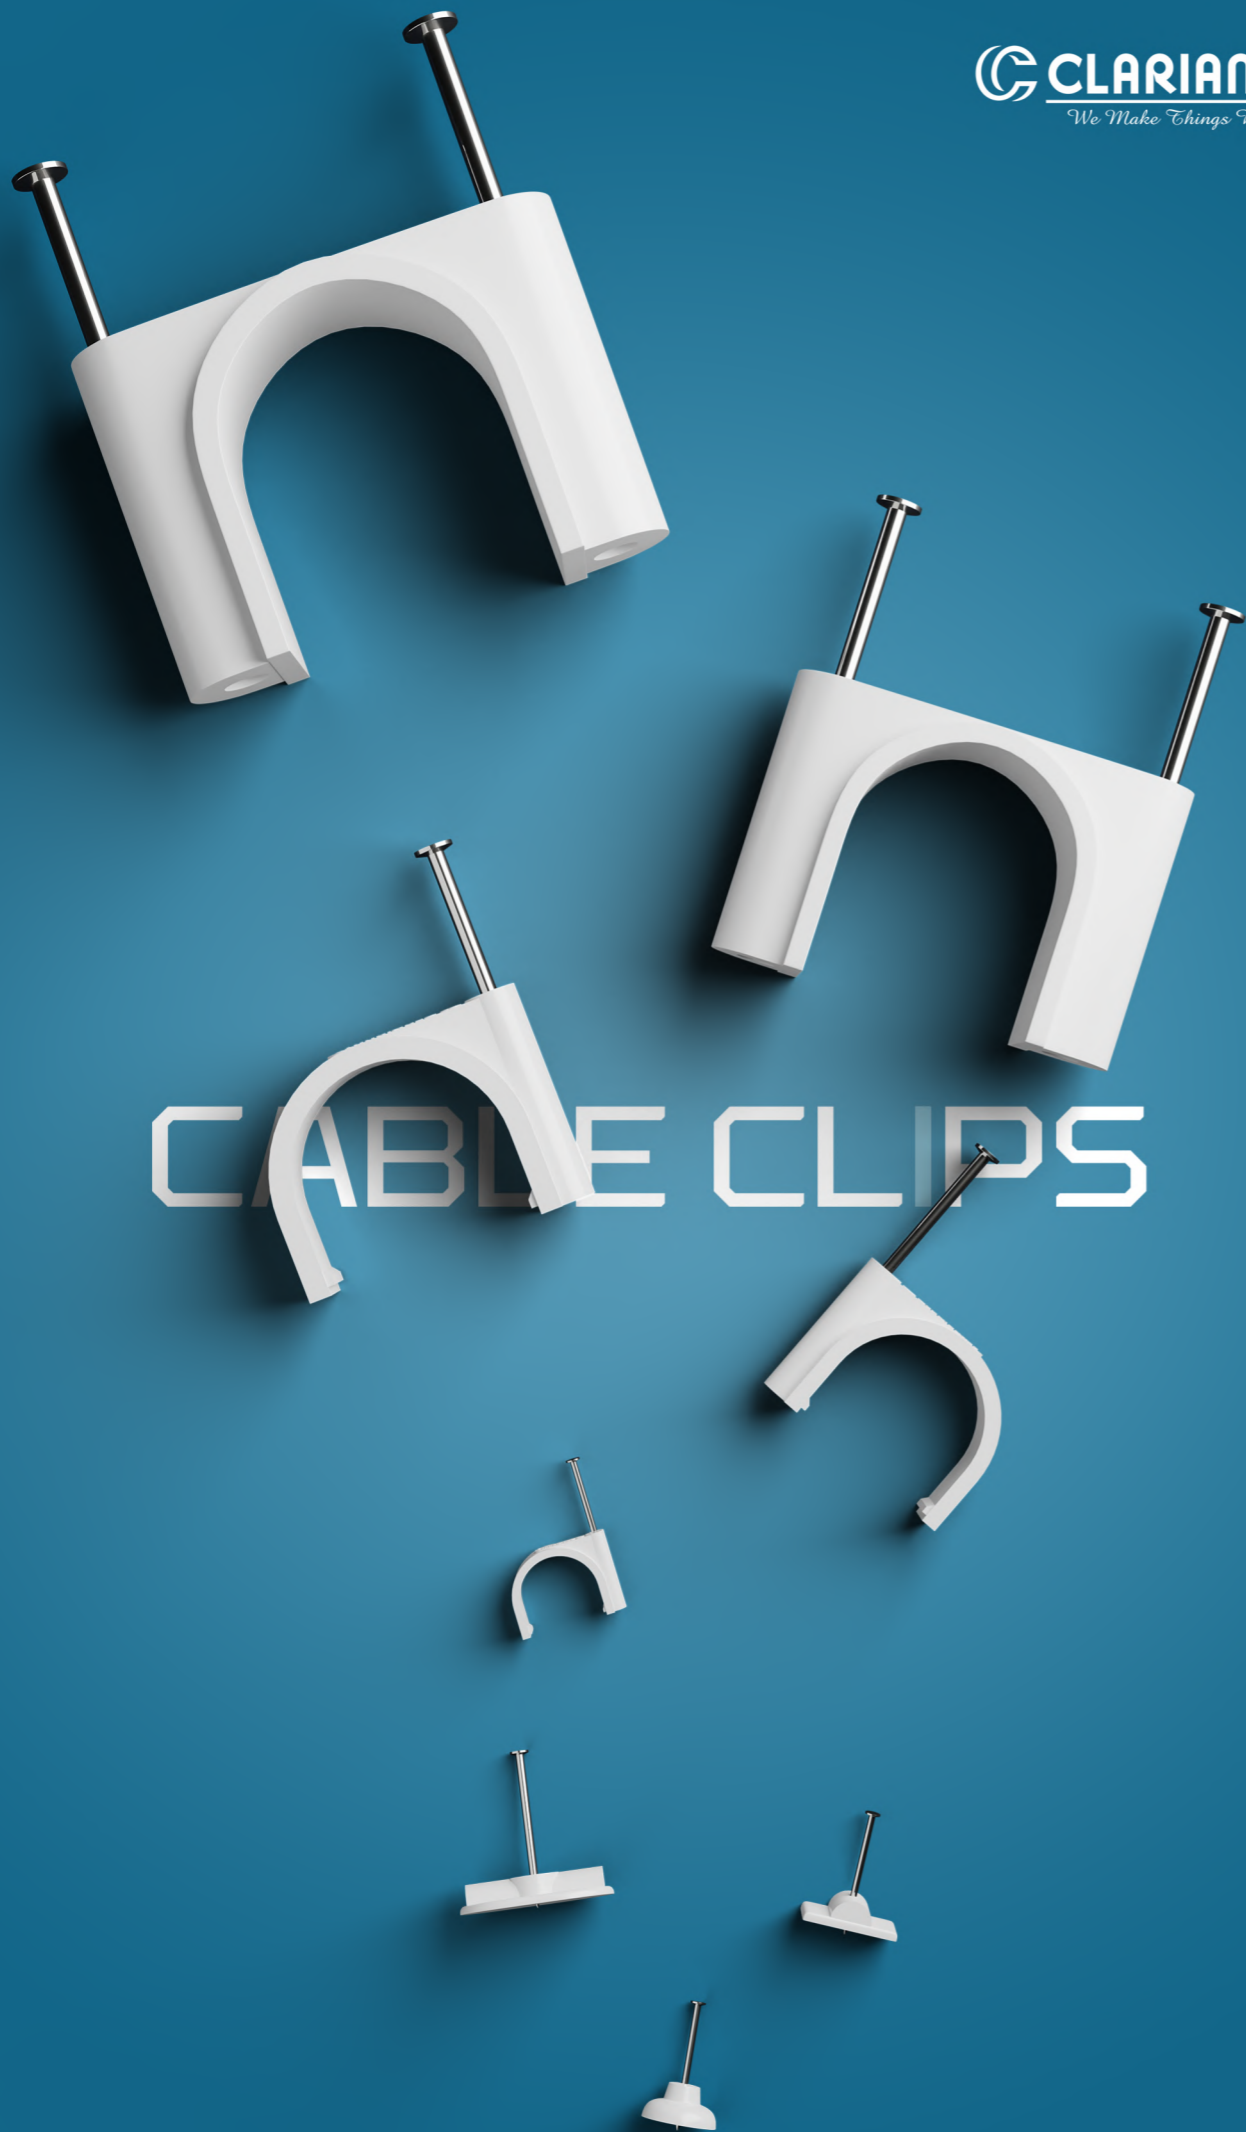

Clariant's MCB boxes are a tribute to innovation and excellence in the field of electrical solutions. With a dedication spanning ten years, we continuously reinvent safety standards, making our products essential for both households and companies as well as for other sectors.

With the introduction of the revolutionary Camera Box, Clariant has been at the forefront of cutting-edge camera technology for almost ten years. This small, user-friendly gadget revolutionises how visual material is recorded, processed, and distributed across sectors by fusing cutting-edge camera technology, clear software, and networking possibilities.

Clariant's Camera Box has various and extensive benefits. With its superior optics and sensors, it offers flawless quality while appealing to both experts and novices. The Camera Box excels as a flexible tool, with applications ranging from live streaming and corporate presentations to education and event coverage. It has a portable design and enables real-time processing, customisation, and dependable durability. As we continue to expand the horizons of what is possible in the realm of visuals, Clariant welcomes you to join the revolution in the creation of visual content.

Camera Box

24

Plastic cable clips are small plastic devices that are used to hold electrical cables or wires in place. They are designed to clip onto surfaces such as walls, ceilings, or other surfaces, and hold cables securely in place.

Some common uses of cable clips include:

Home organization: Plastic cable clips can be used to organize cables behind entertainment centers, computer desks, or any other area with multiple electronic devices.

Office and industrial use: Cable clips are used in offices and industries to organize electrical cables, power cords, and networking cables.

Home improvement: Cable clips can be used to hide cables and wires while doing home improvements such as painting or installing new flooring.

PERKS

Cost-effective: Plastic cable clips are relatively inexpensive compared to other cable management options, making them a popular choice for organizing cables on a budget.

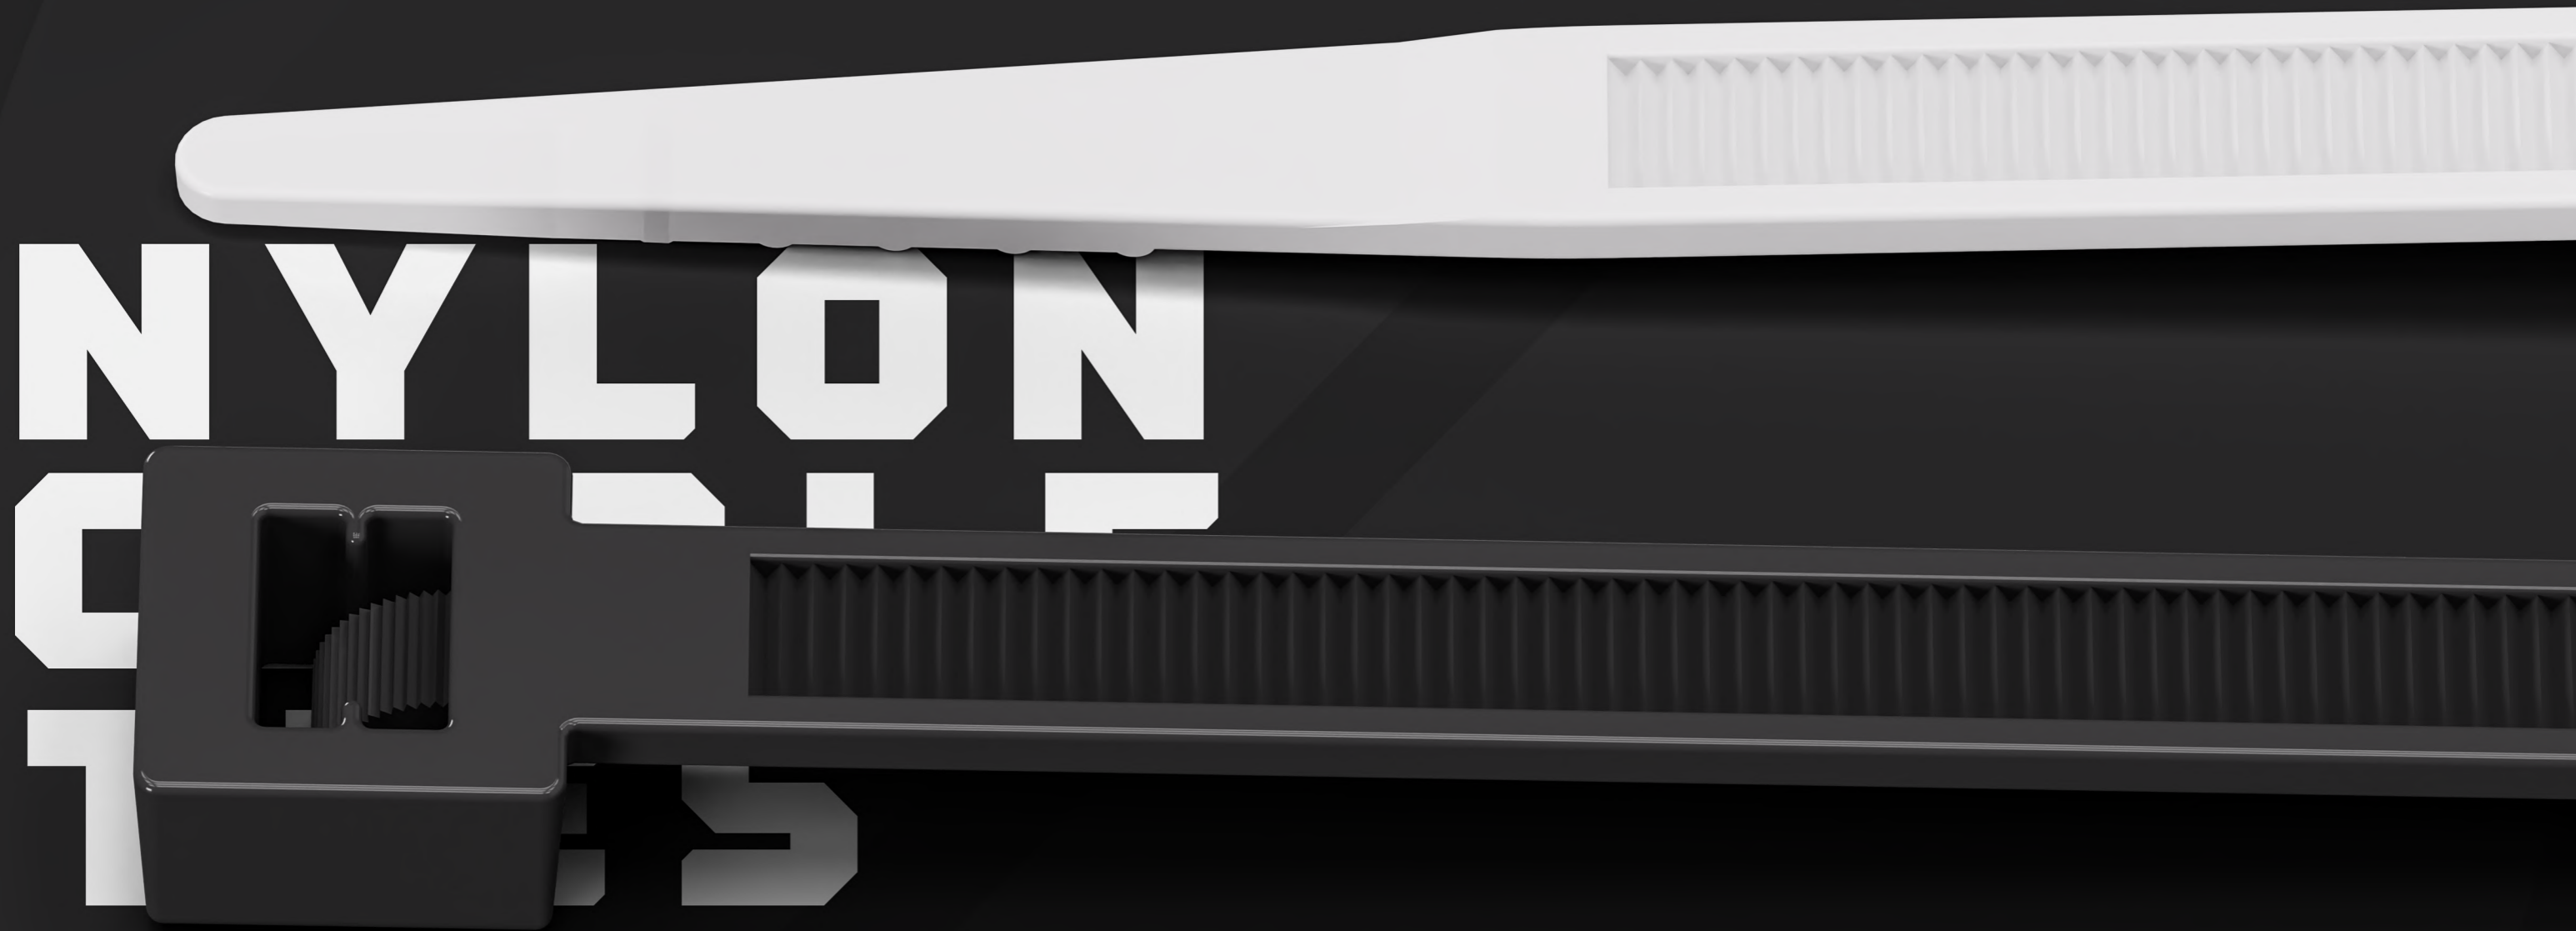

Easy to install: These clips are easy to install and can be attached to various surfaces without requiring specialized tools or equipment.

Non-conductive: As plastic is an insulator, it does not conduct electricity. Therefore, plastic cable clips offer an added level of safety by preventing electrical conductivity.

Versatile: Plastic cable clips come in different sizes and shapes, making them suitable for various types of cables or wires.

Overall, plastic cable clips are a practical solution for cable management, offering ease of use, cost-effectiveness, and **versatility**.

25

Nylon cable ties, also known as zip ties, are a popular fastening solution used in a variety of industries. They are made of nylon and come in a range of sizes and colors.

Uses of Nylon Cable Ties:

Cable management: Nylon cable ties are commonly used to bundle and organize cables and wires in homes, offices, and industrial settings. They are an efficient way to keep cables neat and tidy, reducing the risk of tripping hazards and damage.

PERKS

Versatility: Nylon cable ties can be used for a variety of applications, from bundling cables and wires to securing objects in place. They come in various lengths and strengths, making them suitable for both lightweight and heavy-duty tasks.

Durability: Nylon cable ties are made of high-quality nylon material, making them strong and durable. They are designed to withstand harsh weather conditions, chemicals, and UV rays.

Cost-effective: Nylon cable ties are a cost-effective solution for fastening and securing objects. They are readily available and are sold at an affordable price.

Pipe Fittings Clamps

Clariantt's CPVC & UPVC Pipe Fitting Clamps are the unsung heroes of plumbing and fluid management. These ingenious devices are precision-engineered connectors designed to embrace, secure, and unite CPVC and UPVC pipes with an effortless grip, ensuring leak-free, durable connections in any plumbing project. Clariantt offers a diverse range of clamp sizes to accommodate various pipe diameters, making it easier to find the perfect fit for your specific needs.

PVC Insulation Tape

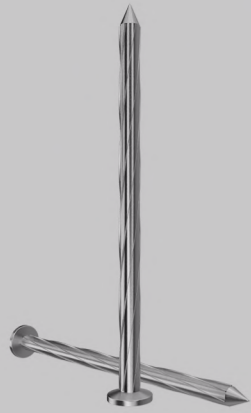

Electrical PVC insulation tape from Clariantt redefines cable management with its numerous benefits. This innovative solution not only guarantees safety with unparalleled voltage control but also enhances aesthetics through colour-coding options. Insulation tape boasts exceptional durability, noise reduction capabilities, and eco-friendliness. Its adaptability in emergencies and effortless application further elevate its appeal. Unleash the potential of your connections, and let Clariantt illuminate your path to innovation!

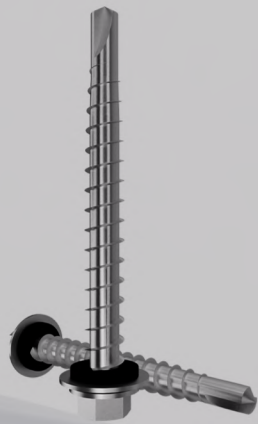

CONCRETE NAILS

Clariant Twisted Concrete Nails, available in six versatile sizes, are the epitome of strength and ingenuity. Their spiral design and unbreakable composition redefine the way you anchor and fasten, unlocking a world of possibilities across various applications. The unique twisted shape ensures unparalleled grip and stability, allowing you to fasten materials securely without fear of loosening or breakage.

SELF DRILLING SCREW

Clariant's self-drilling screws are the unbreakable marvels of the fastening world. These ingenious twisted wonders effortlessly combine drilling and screwing into a single, seamless action. With sizes ranging from 20mm to 120mm, they are the embodiment of precision engineering and the go-to choice for any project demanding speed, strength, and reliability. Ideal for construction, these screws effortlessly penetrate and secure metal beams, ensuring stability in buildings and infrastructure projects.

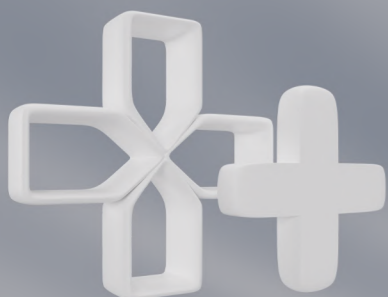

DRYWALL SCREWS

The unsung heroes of construction, Clariant Unbreakable Drywall Screws are like tiny, determined soldiers on a mission to hold your world together. Available in 7 versatile sizes, they're the secret sauce behind the stability and aesthetics of your living spaces. Artists and craftsmen can rely on these screws to bring their creations to life, from bespoke woodworking projects to art installations that defy gravity.

TILE SPACERS

Clariant Plastic Tile Spacers, available in a pristine snow-white hue and five versatile sizes, are the epitome of precision and reliability. The spacers' smart interlocking mechanism keeps them securely in place, preventing accidental shifts during the tiling process. Clariant spacers maintain a consistent gap width, ensuring a seamless finish, even on uneven surfaces. With Clariant Plastic Tile Spacers, you're not just tiling; you're creating masterpieces.

31

BRIDGING
BRILLIANCE
IN EVERY
GONNECTION

Clariant Luminaire Links are the ingenious connectors that bridge the realms of electricity and illumination, elevating the ordinary into an **extraordinary** symphony of light and power. They are the conduits of brilliance and the anchors of innovation, designed to seamlessly fuse with your electrical essentials. These Luminaire Links serve as the pivotal foundation, harmonizing your electrical connections and illuminating your surroundings with unparalleled elegance.
